

IN THE HIGH COURT OF DELHI AT NEW DELHI

Judgment delivered on: 28.04.2015

CRL.L.P.331/2015

DELHI ADMINISTRATION

..... Petitioner

Versus

AKHILESH KUMAR

..... Respondent

Advocates who appeared in this case:

For the Petitioner : Ms Isha Khanna, APP
For the Respondent : None

**CORAM:
HON'BLE MR JUSTICE SIDDHARTH MRIDUL**

SIDDHARTH MRIDUL, J. (ORAL)

1. The present is a petition for grant of leave to appeal against the impugned order dated 30.11.2009 passed by the Additional Chief Metropolitan Magistrate-II, New Delhi, in CC No.118/93 whereby the respondent has been acquitted of the charges levelled against him.

2. The facts herein briefly are, the Food Inspector Sunil Kumar Gupta purchased a sample of Khoya from the respondent on 13.02.1993 at about 08.00 a.m. Thereafter, the Food Inspector divided the sample into three equal parts and 20 drops of formalin were added to each. Thereafter each bottle containing the sample was separately packed, fastened and sealed according to the PFA Act and Rules. The respondent's signatures were also obtained on the LHA slip and the wrapper of the sample bottles. One counterpart of the sample was sent to the Public Analyst in intact condition and two counter parts were deposited with the LHA. Upon analysis it was found by that the sample did not conform to standard laid down as the sample showed that the milk fat is less than the prescribed minimum limit of 20%. Further, it contains starch which is not a natural constituent of milk. The respondent was charged under Section 2(ia)(a)(m) of PFA Act punishable under Section 16(1)(a) read with Section 7 of the PFA Act and Rules to which he pleaded not guilty.

3. The sole contention that was raised before the Trial Court was whether the sample taken was representative or not. It was pointed out on behalf of the respondent that there was vast variation between the report of PA and the Director, CFL which establishes that the sample was not representative.

4. The Trial Court relied upon the decision of this court in **Kanshi Nath vs. State**, 2005 (2) FAC 219, Delhi High Court, wherein it was held as follows:-

“..... To this extent, the argument raised by Mr. Sharma that once the certificate of the Director, CFL is obtained, then that is final and conclusive and the Public Analyst's report cannot be looked into at all for any purpose whatsoever, is not quite tenable. If the variation in the two reports is substantial enough, then the Public Analyst's report can certainly be looked into to establish this variation so as to support the contention of the petitioner that the sample was not representative. As indicated above, the Director, CFL who was examined as CW-1 in cross-examination, has clearly stated that if the content of common salt as quantified by the two experts would have a variation of more than- Y.3% then the samples would not be representative. This is an opinion of an expert and one has to go by it. In the facts of the present case, we find that the variation, as indicated above, is more than Y.3%. Therefore, on the facts of the present case, it can be said that 7 the variation is beyond the acceptable range and would clearly imply that the samples were not representative. In view of this finding and in the background of the law which is well settled, no conviction can be sustained.”

5. Placing reliance upon the aforesaid decision of this court in ***Kanshi Nath*** (*supra*), the Trial Court came to the conclusion that the prosecution had failed to establish that the sample was representative. It was observed by the Trial Court in this behalf as follows:-

“15. In view of the above judgment of the Hon’ble Delhi High Court, I find no force in the contention of the Ld. SPP that the report of the Public Analyst and the Director, CFL cannot be looked into to find whether the sample was representative or not. In the present case, as per the report of the Public Analyst dated 26.2.93 Ex.PW-1/B wherein the opinion given by the Public Analyst, Delhi was that the sample was not conforming to the standard because milk fat was found 7.72% less than the prescribed minimum limit of 20% and further test for starch was found positive. However, second counterpart of the same sample was analysed by the Director, Central Food Laboratory, Mysore on 10.8.93 and the result of analysis of second counterpart of the sample commodity was that milk fat was found 6.6% and test for starch was found negative. Both the reports are divergent to a great extent as Public Analyst found starch in the sample commodity while the Director, CFL did not find any starch in the counterpart of the same sample. Complainant has failed to explain why the analytic result of the counterpart of the same sample analysed by the two Analyst are divergent to such an extent. The difference of analysis in respect of milk fat in respect of sample of Khoa by the report of two analysts is not within acceptable range of 3%. Thereby relying on **Kanshi Nath versus State (Supra)**, I am of the considered view that the sample was not representative due to which divergent reports were given by two experts in respect of counterpart of the same sample.”

6. In view of the decision of this court in ***Kanshi Nath (supra)*** the arguments made on behalf of the State by the learned APP that the trial court should have only considered the CFL report and not the PA report holds no

ground as the perusal of the trial court judgment delineates substantial variance in milk fat between the report of the PA and the Director CFL. Further, the PA report shows the presence of starch whereas as the presence of the same is not shown in the report of the Director, CFL. The State has not satisfactorily explained the said variance.

7. Consequently, the Trial Court came to the conclusion that the petitioner herein has failed to prove that the sample was homogenized and representative and resultantly acquitted the respondent.

8. I see no reason to differ with the conclusion arrived at by the Trial Court passed based on the discussion extracted hereinabove. Consequently, the present petition seeking leave to appeal is without merit and the same is dismissed.
