

further the medical report supports the case of the prosecution.

4. The medical report says that the evidence of attempted penetrative vaginal sexual intercourse and linear abrasion over back were seen. On the date of incident the victim was 3 years and 9 months old. Furthermore, redness around perineum was found. Similarly, redness over labia minora was present.

5. Thus, considering the medical evidence, prima facie the complicity of the applicant in the alleged offence is clear.

6. In the circumstances, the application is rejected.

7. It is expected that in view of the mandate of Section 35 of the POCSO Act, the learned trial Court shall make an endeavour to decide the trial expeditiously.

8. Fees of the advocate appointed to represent the respondent no. 2 be quantified as per the rules.
